## Clean Steam just got safer, Introducing the next revolutionary addition to PUREX: Clean Steam Sample Cooler

Garden City, NY— March 2024 — Exergy proudly announces the launch of PUREX Steam Sample Cooler Cart, a groundbreaking addition to our esteemed product line. Crafted with innovation and precision, PUREX Sampling Systems represent our commitment to providing cutting-edge solutions ensuring that staff can safely handle steam samples.

The PUREX Steam Sample Cooler Cart is designed to facilitate the easy collection of steam samples within industrial environments, thereby enhancing the safety and reliability of steam system operations. This innovation sets a new benchmark in the industry, thanks to its unparalleled portability and convenience for users.

Key features of Steam Sample Cooler include:

- **Mobility to allow for easy transport and maneuverability within a facility**
- **Efficiency to streamline the process of sampling steam**
- **Versatility to customize and accommodate different sampling needs**
- **Accuracy to allow for accurate steam samples for analysis to ensure the quality and efficiency of steam systems**

Exergy stands at the forefront as the leading provider of heat exchanger and point-of-use solutions, driven by a commitment to innovation, precision, sustainability, and client safety. We aim to consistently exceed expectations through our dedication to excellence across all aspects of our business.
