

Global distribution agreement between castus® and Hanag - Formation of castus® sterile systems GmbH & Co. KG with the managing directors Jürgen Hoffmann and Andreas Mayer

Ochsenhausen – The two companies castus® and Hanag Steriltechnik AG have signed a global distribution agreement. Under the agreement, castus® will employ its sales and marketing expertise, providing customers with continued access to Hanag stopper processing systems. In order to strengthen the competence in stopper processing under the umbrella brand castus®, the company founds castus® sterile systems GmbH & Co. KG. The managing directors are Mr. Jürgen Hoffmann and Mr. Andreas Mayer.

Thanks to the worldwide distribution of the Hanag stopper processing systems, the market position of castus® as one of the leading manufacturers of transfer systems for the pharmaceutical industry is consolidated and further expanded. "With this agreement, we have created an excellent basis for a broad international positioning. Thanks to the technical know-how of Hanag Steriltechnik AG in the field of stopper processing and our technology consulting expertise, we can provide customers with innovative solutions in a targeted manner - with the aim of mapping the entire process chain," says Managing Director Jürgen Hoffmann.

Under the umbrella brand castus®, castus® sterile systems GmbH & Co. KG now concentrates the distribution of stopper processing systems. Andreas Mayer has been appointed to the post of Managing Director. He will jointly lead the company with Jürgen Hoffmann.

Mr. Andreas Mayer is a man from the very beginning and has been responsible for the growth of the medium-sized company castus® GmbH & Co. KG as technical project manager for transfer systems (RTPs) together with managing director Jürgen Hoffmann. He is significantly involved in the development of new products. Since 2017 he is in charge as Technical Director.

Both managing directors are looking forward to the new challenge and to working together in a committed team. Hoffmann and Mayer consider the stopper processing line to be an exciting market with great potential, which will further expand the portfolio of transfer systems.

For the first time castus® and Hanag will exhibit together at the P-MEC in Greater Noida, India from November 26th - 28th. The products will be presented at booth 11. C25 of the sales partner Pharmalab.

castus®

castus®, based in Ochsenhausen in southern Germany, is one of the leading manufacturers of rapid transfer port systems (RTPs) for the pharmaceutical industry. The core products are developed, manufactured and assembled on site. The castus® system allows a contamination-free loading and unloading of components in and out of the isolator. The focus is always on the optimal protection of operator and product. All products are developed with hygienic design principles in mind and fulfill the high quality standards of the pharmaceutical industry.
