

### **Qualicaps® to Introduce New UV Laser Printers at Interphex**

WHITSETT, N.C. – Building on its tradition in equipment innovation, Qualicaps Equipment Division will introduce the QUALIS-US and LIS-Labo UV laser printers at Interphex 2019.

The QUALIS-US UV laser printer imprints on tablets at a speed up to 400,000 per hour, making it one of the fastest UV laser printers in the world. It is more compact than the company's existing UV laser printer (Qualicaps' LIS-250D), includes a built-in blower, and requires fewer change parts.

Qualicaps will also be introducing the LIS-Labo UV laser printer for laboratories, which is ideal for small or R&D batches and samples. This machine can imprint up to 128 products simultaneously without the need for tablet alignment. Other benefits of the LIS-Labo include the ability to imprint numerous tablet shapes and sizes; compatibility with various software including CAD, 2D code, bitmap; font editing; and a tablet angle detection function system.

UV laser imprinting has many benefits, including the elimination of defects caused by ink, flexible design options, a larger print surface, as well as manufacturing cost reduction. Other advantages include the potential to help with counterfeiting, reducing medical errors, and differentiating your brand.

For more information about Qualicaps' UV laser technologies stop by booth 3021A at Interphex, visit [www.qualicaps.com](http://www.qualicaps.com) or call 1-800-CAPSULE.

###

Qualicaps is a global manufacturer and supplier of empty pharmaceutical capsules and pharmaceutical processing equipment, with manufacturing sites in the U.S., Canada, Japan, Europe and Brazil. With more than 100 years of experience, Qualicaps is a leader in innovation in both gelatin and Quali-V® capsules, and offers a proprietary product line of pharmaceutical equipment, including capsule filling, sealing, inspection and imprinting machinery.
