FOR IMMEDIATE RELEASE

Material Transfer and Ambrose Introduce IntelliBreak: A Groundbreaking Robotic Bag Break Station to Revolutionize Bulk Material Handling at PACK Expo International

ALLEGAN, MI (October 2024) – Material Transfer and Ambrose are proud to announce the debut of the IntelliBreak Robotic Bag Break Station, a cutting-edge solution designed to revolutionize bulk material handling across industries. IntelliBreak maximizes return on investment (ROI) by improving safety, efficiency, and cost-effectiveness in manufacturing processes, offering businesses a smarter, more streamlined approach to handling labor-intensive tasks.

The IntelliBreak Robotic Bag Break Station automates the traditionally manual process of breaking and emptying fifty-pound bags, helping companies significantly reduce labor costs and workplace injuries while improving throughput and operational flexibility. This innovative technology is poised to redefine how industries approach bulk material handling, delivering both immediate and long-term savings.

“The IntelliBreak Robotic Bag Break Station represents a significant leap forward in how companies can approach material handling,” said Sergio Carrillo, Director of Sales and Marketing. “By addressing key challenges like worker safety and operational risks, we’re empowering businesses to protect their workforce while optimizing efficiency. This solution offers the flexibility and innovation companies need to stay ahead in today’s competitive landscape.”

Material Transfer and Ambrose are excited to debut IntelliBreak at **PACK Expo 2024**, held from November 2–5 in Chicago, IL. Attendees can explore a virtual experience before the concept is released to the market and learn more about how IntelliBreak is transforming bulk material handling at **Booth LU-7222**.
