

PRESS RELEASE

INTERPHEX 2025: GF and Hapa present injection pen assembling and BFS printing innovations

New York, USA – Coesia companies **GF** and **Hapa** present their latest pharmaceutical packaging solutions at **INTERPHEX 2025 from April 1 to April 3** at the **Javits Center in New York City**. Visitors to **booth 3507** will have the opportunity to explore pioneering technologies designed to enhance efficiency, reduce waste, and improve compliance in pharmaceutical packaging.

Hapa presents *bfsjet*: A milestone in BFS printing

Hapa showcases the **H871 *bfsjet***, an innovative digital printing solution developed to streamline **Blow-Fill-Seal (BFS) packaging**. By eliminating traditional labeling, embossing, and pad printing processes, this technology enables pharmaceutical manufacturers to achieve:

- **Rapid artwork changes** to enhance flexibility and responsiveness
- **Significant waste reduction** for improved sustainability
- **Simplified production workflows**, reducing operational complexity

Equipped with Hapa's proven **redcube+ technology**, the ***bfsjet*** provides high-quality, customizable one- or two-color printing directly onto the BFS. This solution helps manufacturers to reduce waste and reach sustainability goals while optimizing pharmaceutical packaging processes.

Expertise in pharma solutions

GF, a recognized leader in pharmaceutical filling and inspection technologies, will also be present at INTERPHEX 2025. In 2024, GF launched its first **Pharma Assembling Machine (PAM)**, a fully automated platform designed for high-speed, precision assembly of pharmaceutical injection pens and self-medication devices. Its modular, scalable design ensures adaptability to customer needs while enabling flawless assembly of small components. GF's experts will be available to discuss its capabilities and share insights into its impact on efficiency, accuracy, and compliance in injectable drug delivery solutions.

A Commitment to innovation and trust

Hapa has decades of expertise in on-demand and late-stage customization printing solutions. The company is committed to delivering precision, reliability, and efficiency. Its human-centered approach ensures strong industry relationships and excellent support for healthcare packaging, where accuracy and compliance are crucial.

About Coesia:

Coesia, with its headquarters based in Bologna, Italy, consists of a group of companies specializing in highly innovative industrial and packaging solutions. Coesia's companies are leaders in the fields of advanced automatic machines, industrial process solutions, and high-performance transmissions. Coesia's customers operate in a wide range of industries, such as aerospace, ceramics, pharmaceuticals, electronics, healthcare, automotive, tobacco, food and beverage, consumer, and luxury goods.

About GF:

GF, a Coesia company, is a global leader in providing advanced solutions for the pharmaceutical and healthcare industries. GF specializes in designing and manufacturing machinery for filling and inspection processes, offering highly reliable and precise equipment that meets stringent regulatory standards. With a focus on innovation and customer satisfaction, GF continues to deliver cutting-edge technologies to its worldwide customer base, enhancing productivity and operational efficiency.

About HAPA:

Hapa, a Coesia company, is a leader in innovative printing technologies for the pharmaceutical industry. Specializing in late-stage customization and digital printing, Hapa offers solutions that enhance flexibility, efficiency, and safety in pharmaceutical packaging. With a commitment to quality and innovation, Hapa integrates advanced digital technologies and user-friendly designs, such as the award-winning OptiMate HMI and Vision Secure inspection system. Leveraging Coesia's extensive expertise in packaging and automation, Hapa meets the dynamic needs of global clients.
