

PRESS RELEASE

SEA Vision USA Showcases Pharmaceutical Technologies at INTERPHEX 2025

New York, NY – SEA Vision USA is excited to announce our participation at INTERPHEX 2025, the premier event for pharmaceutical, biotechnology, and device development and manufacturing. From April 1st to April 3rd, 2025, visitors can explore our latest innovations at Booth 2705 at the Jacob Javits Convention Center, New York.

With over 30 years of expertise in pharmaceutical vision systems, serialization and digitalization, SEA Vision USA will present a range of state-of-the-art solutions designed to enhance efficiency, compliance, and quality control in pharma production.

Innovations on Display at Booth 2705:

- **A-Eye Clearance:** An advanced AI-powered automated line clearance solution, ensuring fast, accurate, and secure line clearance to optimize production efficiency.
- **Vision Inspection System (OCVMulti):** A powerful multi-inspection system for syringes, demonstrated on a magnetic transport module to showcase precision, flexibility, and reliability in pharmaceutical packaging.
- **TrackPCA – Serialization & Aggregation Workstation:** A compact and cost-effective track & trace solution for serializing cartons and performing multi-level aggregation on cases and pallets. This smart, all-in-one module integrates seamlessly into production environments, ensuring compliance with regulatory requirements.
- **Yudoo Software Suite:** The next-generation digital pharma productivity platform that unlocks the potential of data-driven production with real-time monitoring, predictive analytics, and seamless workflow automation.

Don't miss the opportunity to see these solutions in action and discuss how SEA Vision USA can support your manufacturing and compliance needs. Book a meeting with our team or stop by Booth 2705.
